

**Product Name :**  
Alkali Aggregate Reaction Bath**Product Code :**  
LABENGINEERING-INDIA-CAT330026**Description :**

Alkali Aggregate Reaction Bath

**Technical Specification :**

The temperature can be adjusted between ambient to 80°C by using the digital controller with 2°C accuracy. The Alkali Aggregate Reaction Bath to keep 25 x 25 x 285 mm samples in NaOH (Sodium Hydroxide) or in any other solution at a specified temperature.

The chamber is made of stainless steel and has a capacity for 36 specimens (25 x 25 x 285 mm).  
Stainless Steel alkali specimens cans.
