

Product Name :
Laboratory Vane Shear Apparatus Motorised

Product Code :
LABENGINEERING-INDIA-CAT290065

Description :

Laboratory Vane Shear Apparatus Motorised

Technical Specification :

Rotation of the vane is by means of an electrically operated rate of rotating is 1/60 R.P.M. Suitable for operation on 230 V A.C.

consists of a torque head adjustable in height by means of a lead screw rotated by a drive wheel to enable the vane to be lowered into the specimen.

Single Phase which operates a worm gear arrangement turning the upper end of a calibration torsion spring, vane dia, rod dia, vane size & vane height are as per IS specifications.

with set of four springs, one each of approx. 2 kgs/cm², 4kgs/cm², 6 kgs/cm² & 8kgs/cm² complete as above in a wooden carrying case.

The vane shaft is attached through the hollow upper shaft to a resettable pointer, which indicates the angle indicates the angle of torque on a dial graduated in degree the dial reading multiplied by spring factor gives the torque a container for soil sample is also supplied & a sampling tube of 38mm. i.d. & 150mm long can also be used as container.
