

Product Name :
Temperature Measurement Trainer

Product Code :
POL-HVC0002

Description :

Temperature Measurement Trainer

Technical Specification :

Acquisition of the basic principles of the temperature measurement through the tests
Learning of different methods, knowledge of their areas of application and to their particularities
Methods non-electrical
Electrical Methods
Calibration of temperature probes for electrical
Heating Element Power: Minimum 300W Adjustment of the power supplied via a power outlet to power regulation Heating Element of laboratory: Power: Minimum 450W Max. Temperature . : Minimum 425 °C
Thermos bottle: minimum 1L
