Product Name:

Product Code: CHINAELABC0030072

Description:

Diesel Engine Management Systems Panel Trainer

Technical Specification:

Diesel Engine Management Systems Panel Trainer provides students and instructors with the opportunity to demonstrate, investigate and fault-find a simulation of typical diesel engine management systems. The trainer is designed to allow access to a variety of test points for vehicle electrical components, as well as provide an understanding of the overall system layout and configuration. To facilitate the development of techniques in diagnostics and fault-finding skills, the panel includes a range of fault-insertion options to simulate typical real-world system malfunctions.

Training Learning Concepts:

Electronic control module

Engine protection

Engine exhaust emissions

Engine management analog sensors

Engine management digital sensors and switches

Engine management active sensors

Cruise control

Engine management actuators

Trainer includes: Curriculum Manual CD

Engineering Lab Equipment India
