

Product Name :
Calorimeter for Cement and Concrete

Product Code :
LABENGINEERING-INDIA-CAT280006

Description :

Calorimeter for Cement and Concrete

Technical Specification :

Special Features of the Solution Calorimeter for Cement and Concrete :

Evaluation and documentation of test results via computer

Fully-automatic test procedure

Rigid, durable measuring instrument for industrial and laboratory use

Simple operation

Self-calibrating

Control Device

From the beginning of the test, the control device operates the procedure with a direct interface.

The control stabilizes the thermal signal and amplifies it to be a measurable voltage.

It also monitors the internal measuring cell temperature.

All data is logged on an internal drive for later download.

Technical Specifications for the Solution Calorimeter for Cement and Concrete :

EN 196-8, ASTM C 186, BS 4550

Consists of a Dewar vessel, which is located in an insulation wooden box, an electrically driven stirrer with constant speed and a funnel. (Dewar vessel can be easily removed from the wooden box and replaced.)

Power: 230V / 50Hz

Engineering Lab Equipment India
