Product Name: Specific Gravity Bottles Product Code:
LABENGINEERING-INDIA-CAT290024

Description:

Specific Gravity Bottles

Technical Specification:

Glass bottles complete with capillary vent stopper.

The determination of the specific gravity and density of fine soils is developed through three different operations: the sample, introduced in the specific gravity bottle, has to be thermostatically normalized by immersion in a suitable water bath complete with Adjustable tray and Cover with cooling coil (see accessories), then de-aired using a dessicator connected to a vacuum pump (see accessories) and, finally, weighted.
